DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/4/2008 has been entered.

Allowable Subject Matter

2. Claims 39-42 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. Applicant defined a slow cookie as a GET ACCESS cookie. A slow cookie is not immediately available. Specification, [0024]. The slow cookie is generated. Specification, [0034]. The generated cookie is explicitly defined as a GET ACCESS cookie. Specification, [0004]-[0005]. Specification, [0034]. Specification, [0044]-[0045]. To signify that the client has previously received a slow GET ACCESS cookie, a transparent image gif file is linked to a connection request. The transparent image gif file is displayed as part of the web site which the client accesses.
5. Applicant presented this method and system as being present only in a two-tier authentication system. The fast cookie was the initial authentication. The slow GET ACCESS cookie was generated later after the initial authentication.
6. The slow GET ACCESS cookie is transmitted based on Applicant's following claim language:
 - a. The server receiv[es] from the client a connection request to the server system...including a clear gif link, said request (1) including an indicia evidencing client receipt of the slow cookie or (2) not including an indicia evidencing client receipt of the slow cookie; wherein the clear gif link comprises a link to a transparent image file;
 - b. Based on the clear gif link connection request, the server system determin[es] if the slow cookie has been received by the client pursuant to a prior request from the client;

Art Unit: 2145

c. ...if the slow cookie is determined by the server system to have been previously received by the client, the server system responds to the connection request with a clear gif response without the slow cookie, and permits the client to access further resources from one or more of said websites;

d. ...if the slow cookie is determined by the server system not to have been previously received by the client, the server system attempts to generate and provide the slow cookie in a clear gif response that includes the slow cookie;

Wherein the fast cookie is immediately available for transmission to the client and the slow cookie is not immediately available for transmission to the client.

7. Applicant limited the system and method to those servers which create slow cookies. Applicant defined slow cookies as GET ACCESS cookies which must be generated. Applicant therefore limited the system and method to those servers which create GET ACCESS cookies.

8. A GET ACCESS cookie server system that performs all elements of Applicant's claim language is not known in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Hind et al. US 7,003,565

11. Yu US 7,092,992

12. Yu discloses the transmission of a cookie with a hidden or transparent GIF in column 23, lines 16-

54. Yu does not disclose a system with a GET ACCESS cookie that is generated, nor does Yu disclose a system where a previous "fast" cookie showing authentication has already been received by the client.
